

Which WiFi should I choose?

BETHEL

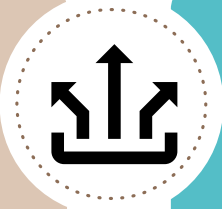

Basic access available for guests and non-Bethel devices.

BSD403

Preferred access available for all student and staff devices.

High level filtering for all device connections.

Custom filtering for each user based on grade level and/or employee position type.

Prevents access to some district systems regardless of device used.

Allows access to Bethel systems for students and employees using a Bethel Device.

Data and speed limits are applied.

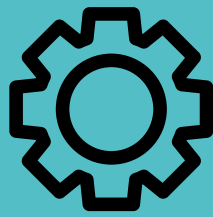

No data or speed throttling applied.

Printing not allowed.

Allows Bethel devices to print.

Keep your macOS updated

How do I connect to a printer?
